Read the following passage carefully and answer the questions No's 1 to 3:

The National Education Policy (NEP) 2020 is a comprehensive framework for the development of education in India, from elementary to higher education. Approved by the Union Cabinet on July 29, 2020, NEP 2020 aims to transform the educational landscape of India, making it more holistic, flexible, multidisciplinary, and aligned to the needs of the 21st century.

One of the key features of NEP 2020 is the reconfiguration of the school curriculum and pedagogy to promote holistic development, critical thinking, and experiential learning. The policy replaces the 10+2 structure of school education with a 5+3+3+4 system, corresponding to the age groups of 3-8 years (Foundational Stage), 8-11 years (Preparatory Stage), 11-14 years (Middle Stage), and 14-18 years (Secondary Stage). This new structure aims to ensure that Early Childhood Care and Education (ECCE) is given its due importance.

NEP 2020 also emphasizes the importance of mother tongue/local language as the medium of instruction, at least up to Grade 5, but preferably up to Grade 8 and beyond. This is to ensure that children can grasp foundational concepts better when taught in their home language. The policy encourages the use of technology in education, promoting digital literacy and the development of virtual labs and online assessments. It envisions a more significant role for technology in teaching and learning processes, especially in remote and underserved areas. Higher education reforms under NEP 2020 include a holistic and multidisciplinary undergraduate education with flexible curricula, creative combinations of subjects, integration of vocational education, and multiple entry and exit points. The policy proposes setting up a Higher Education Commission of India (HECI) to regulate higher education. Furthermore, NEP 2020 promotes research and innovation by establishing a National Research Foundation (NRF) to fund, coordinate, and promote research in the country. It also advocates for the internationalization of education by encouraging top foreign universities to set up campuses in India.

In terms of teacher education, NEP 2020 calls for a complete overhaul and reformation of the current system to ensure rigorous preparation and continuous professional development of teachers. Overall, NEP 2020 aims to make India a global knowledge superpower, ensuring that the education system nurtures individuals capable of critical thinking, creativity, and problem-solving.
